ThirdLynx Focusers Integrated focuser automation

No external controllers required!

Optec ThirdLynx motors offer an easy and convenient way to automate your existing Focuser. Each motor contains all the electronics needed to operate, no external controller required! Simply install the motor, connect power and USB and you are ready to begin focusing.

Each motor is custom designed to work with a different focuser. This allows each to provide the highest quality of fit and focus.

The ThirdLynx software supports Windows, Linux, and macOS. ASCOM, Alpaca, X2 and INDI are all supported.
