TCF-LSI Temperature Compensating Focuser

The Optec Classic keeps getting better

Optec's TCF-S LSI 2" and 3" feature Optec's robust Crayford-style focuser with fully integrated electronics, no external controller required. The 2" model features 0.6 inches of travel with 2.2 micron steps while the 3" model features 1.0 inches of travel with 2.5 micron steps. Both feature temperature compensation and support external temperature probes. The Optec FocusLynx driver stack enables support for ASCOM, Alpaca, X2 and INDI programs over the integrated serial port. (Shown with optional IN/OUT keypad)
